

ACS News

We Invite You to:

FloorTek

September 10-12 in Dalton, GA
Visit us at Booth #317

FloorTek is the up-and-coming hub of cutting-edge technology in the floorcovering industry, allowing attendees and exhibitors alike to network and experience career enriching activities. FloorTek 2019 focuses on innovation, which exhibitors will be showcasing both in their booths and through special sessions and keynote speakers.

Southern Automotive Conference

September 25-27 in Nashville, TN
Visit us at Booth #419

The SAC features exhibitors, networking opportunities, world-class speakers, and invaluable breakout sessions designed to propel your career and business forward. Attendees will have a front-row seat to the newest tech from across the auto world, as well as first dibs on breaking industry news and updates. Last year, over 180 exhibitors were at the SAC,

Over 60 exhibitors will be there, and ACS is one of them. We welcome you to visit booth #317 to see us and our solutions for automation and for the carpet industry, including robotics, machine vision & ID, and more. Also, we welcome you to attend our breakout sessions.

Solve Challenging Label-Based Applications

Cognex DataMan® 370 series fixed-mount barcode readers solve challenging label-based multi-code, multi-symbology applications using Cognex's latest decoding algorithms, a multi-core processor, and new integrated lighting.

DataMan 370's innovative design with modular lighting, lens, and communication options provides maximum flexibility and ease-of-use. New high-powered integrated torch (HPIT) provides unmatched illumination power, eliminating the need for external lighting. This reader embeds the latest liquid lens technology and auto-focus system to quickly adapt to different target distances.

Attend Collaborative Robots Safety Training

ria

Robotic Industries Association

The RIA (Robotic Industries Association) is the only trade group in North America organized specifically to serve the robotics industry. Since the release of the RIA TR15.606-2016, Collaborative Robots safety requirements specific to collaborative applications and robot systems are now in focus. This class will ensure you're trained on the latest in collaborative application safety.

Students will go through:

- Basic Robot Safety Requirements
- Introduction to Standards including the ISO/TS 15066:2016
- Considerations unique to Collaborative Applications
- Risk Assessment Practical Exercise using a Power and Force Limited application example

Dog Spotlight- Meet Bamboo & Dakota

Presenting: our twelfth Dog Spotlight! If you've visited our office before, then you already know that we are a pup-friendly workplace. We've decided to feature one of the ACS dogs every other month to let you "meet" them too.

What would you like to know about Carol's puppies Bamboo and Dakota?
